Renewals: One 5-year renewal
remaining
Agreement: Competitive

LEGACY DATA ARCHIVE (LDA) FOR PATIENT RECORDS

The more EHRs you inherit, the greater the chance of failure. VisualVault's Legacy Data Archive (LDA) lets you retire secondary EHRs and consolidate all legacy patient records into a secure, HIPAA-compliant cloud platform—removing risk, cutting costs, and keeping data available when you need it.

EHR SPRAWL EXPOSES YOUR ORGANIZATION TO RISK

EHR sprawl is a numbers game. With every acquired system, outages, data loss, and compliance exposure become more likely. VisualVault's LDA is the proactive answer: we decommission acquired EHRs, migrate and de-duplicate legacy patient records, and house them in our rock-solid, HIPAA-compliant platform.

The result? Fewer servers, fewer invoices, fewer headaches — and easier access to the data you need. Free physicians and the HIM team from the frustration of navigating multiple systems and deliver your organization the stability and risk protection it requires.

A SOLUTION THAT DELIVERS ON MULTIPLE FRONTS

The VisualVault approach provides a logical, repeatable and simple means of archiving records, which results in:

Stability

All legacy records are housed in a highly-secure repository maintained by VisualVault

Staff Satisfaction

Physicians & HIM staff will enjoy fast, easy and dependable access to patient records

Savings

Retire legacy EHRs and save on licensing and maintenance fees

Speed

We execute in half the time of our competitors

WORK WITH A LEADER

VisualVault is an expert in patient data management and the archiving of legacy patient records. The largest healthcare provider in the country relies on us for the archiving of their patient records. We have experience archiving over 50 different EHR systems, count over 1000 hospitals and physician groups as clients and have over 1.1 billion patient records under management.

50+ systems

1000+ clients

1.1+ billion
patient records
under management

The numbers are impressive but what they telegraph is experience and you can benefit from that experience. We have the process down to a science. We make it easy. We execute quickly. Your data is secure. And it remains accessible and in an optimal format for continuing to deliver superior patient care.
